

The GASWorkS™ software is licensed on a subscription basis. All upgrades and updates are included in the subscription price and technical support (as long as the subscription “fee” is paid and up-to-date). Subscriptions are purchased per User, with discounts applied for multiple (concurrent) Users.

When purchasing a new license or upgrading to a GASWorkS 10.2 license, an “activation fee” will be due for the first year of use. An annual “Renewal Fee” is then required for continued access and use of the software. The Renewal Fee is due before the anniversary date of the subscription’s initial activation. If the Renewal Fee is not paid before the anniversary date, the subscription will be suspended until paid. If the fees for a suspended subscription are not paid within three years, the subscription is considered expired, and a new subscription must be purchased.

The “upgrade/activation” fee is waived for the first year of use for current GASWorkS 10.0 or 10.1 Users who upgrade to GASWorkS 10.2. Users are responsible for the annual “Renewal Fee” to continue accessing and using the GASWorkS software.

The GASWorkS software is delivered by way of electronic download. The software requires a device configured to run Windows 7 through Windows 11. On the first execution of the software, the User’s device will need to be connected to the internet. After that, a license can be “checked-out” for up to 30 days of offline use, only requiring an internet connection to check for updates or to extend the offline license.
